## **DETAILED ACTION**

### ***Claim Objections***

Claim 19 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 19 specifies the wear resistance is determined by the manner in which the apparatus is used as evidenced by the drum driving time and drum peripheral speed parameters. As noted previously, "recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus." See *Ex parte Masham*, 2 USPQ2d 1647 (Bd. Pat. App. & Inter. 1987). Claim 19 thus fails to properly further limit claim 1 because the manner in which the apparatus is used in this claim does not provide any further structural limitation on the apparatus.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3, 7-9, 11-13, 15-17 and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 has been amended to specify "the toner image" at the second line of the new "wherein" clause. There is no prior recitation of a "toner image" in the claim and it is

Art Unit: 1756

consequently unclear where the first roller is located because this feature is dependent on the position of the "toner image". Clarification is requested.

### ***Remarks***

The Examiner notes that instant claim 1 has been amended to specify "paper rollers for paper transferring". It is apparent from the limitations in the recently added "wherein" clause that these rollers are not made of paper but are actually made of POM and EPDM, as specified. It is further apparent that these are the same rollers referred to as "paper transporting roller(s)" later in the claims. The Examiner also notes that the cleaning means in the added "wherein" clause refers to the "cleaning means for removing paper powders". Although these limitations would be understood by the artisan the Examiner requests that applicants consider minor editorial amendments to add further clarity to the claims.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 1756

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
